

Project proposal format: Proposals should be one page maximum. Include the following information:

- Project title
- Data set
- Project idea. This should be approximately two paragraphs.
- Software/Algorithms you will need to implement or use.
- Teammate: will you have a teammate? If so, whom? Maximum team size is three students. We expect projects done in a group to be more substantial than projects done individually.
- If working with a team, you should also describe what portion of the project each partner will be doing.
- List three detailed big milestones. (I will check at your specified dates)
